

Module 1 Overview

For module 1, you will:

1. Identify the data mining definition and tasks.
2. Learn data attributes.

Throughout the semester, I will post some materials ahead of schedule so that you can work ahead if you wish.

To do:

1. Introduce yourself in the previous module (due Saturday night at midnight)

2. Watch the videos above. You can also download the lecture slides and take your own notes.
Alternatively, here is the [link \(https://youtu.be/98TbBWUn13s\)](https://youtu.be/98TbBWUn13s) to the class recording (It covers the same content as the videos, so it's optional—use it if you'd like to see how the in-person session looks.)
3. Quiz 1 (due one day before the next class)
